Editorial Review

Review

‘For any laboratory performing cytologic examinations of serious fluids, by either the ‘hematologic’ (Romanowsky) or the Papanicolaou technique, this book is essential.’

B. Naylor, Cytotechnologist's Bulletin, 1990

‘Although this practical and useful book will be of greatest interest to pathologists, all medical practitioners who encounter patients with fluid collections of the serious cavities will find it interesting. It belongs in the reference libraries of all laboratories performing body fluid cytology and of all medical practitioners using the results.’

Annals of Internal Medicine, 114 (8) April 1991

‘I thoroughly recommend it as an essential reference book for anyone working in this field.’

Journal of Pathology, 165 (2) 1991

Users Review

From reader reviews:

Eula Hunter:

Nowadays reading books become more and more than want or need but also work as a life style. This reading routine give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book this improve your knowledge and information. The details you get based on what kind of guide you read, if you want get more knowledge just go with training books but if you want experience happy read one using theme for entertaining for instance comic or novel. The particular *Atlas of Serous Fluid Cytopathology: A Guide to the Cells of Pleural, Pericardial, Peritoneal and Hydrocele Fluids (Current Histopathology)* is kind of book which is giving the reader capricious experience.

Andrew Comer:

Reading a reserve can be one of a lot of activity that everyone in the world adores. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new data. When you read a guide you will get new information because book is one of several ways to share the information or even their idea.
