### C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) By J. Ross Quinlan

Classifier systems play a major role in machine learning and knowledge-based systems, and Ross Quinlan's work on ID3 and C4.5 is widely acknowledged to have made some of the most significant contributions to their development. This book is a complete guide to the C4.5 system as implemented in C for the UNIX environment. It contains a comprehensive guide to the system's use, the source code (about 8,800 lines), and implementation notes.

C4.5 starts with large sets of cases belonging to known classes. The cases, described by any mixture of nominal and numeric properties, are scrutinized for patterns that allow the classes to be reliably discriminated. These patterns are then expressed as models, in the form of decision trees or sets of if-then rules, that can be used to classify new cases, with emphasis on making the models understandable as well as accurate. The system has been applied successfully to tasks involving tens of thousands of cases described by hundreds of properties. The book starts from simple core learning methods and shows how they can be elaborated and extended to deal with typical problems such as missing data and over fitting. Advantages and disadvantages of the C4.5 approach are discussed and illustrated with several case studies.

This book should be of interest to developers of classification-based intelligent systems and to students in machine learning and expert systems courses.

## Users Review

### From reader reviews:

#### **Eric Lowe:**

Now a day people that Living in the era exactly where everything reachable by talk with the internet and the resources within it can be true or not call for people to be aware of each information they get. How many people to be smart in receiving any information nowadays? Of course the answer is reading a book. Reading through a book can help people out of this uncertainty Information specially this C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) book since this book offers you rich facts and knowledge. Of course the info in this book hundred percent guarantees there is no doubt in it you probably know this.

#### **William Fuller:**

Spent a free a chance to be fun activity to accomplish! A lot of people spent their spare time with their family, or their very own friends. Usually they accomplishing activity like watching television, planning to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of e-book that you should read. If you want to try look for book, may be the reserve untitled C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) can be excellent book to read. May be it is usually best activity to you.

#### **Jeff Sanchez:**

People live in this new morning of lifestyle always aim to and must have the spare time or they will get large amount of stress from both lifestyle and work. So , whenever we ask do people have time, we will say absolutely of course. People is human not just a robot. Then we consult again, what kind of activity do you possess when the spare time coming to a person of course your answer may unlimited right. Then ever try this one, reading textbooks. It can be your alternative inside spending your spare time, the particular book you have read is C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning).

#### **Anthony Muller:**

As a student exactly feel bored to reading. If their teacher expected them to go to the library in order to make summary for some reserve, they are complained. Just small students that has reading's internal or real their passion. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading really. Any students feel that studying is not important, boring as well as can't see colorful photos on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this C4.5: Programs for Machine Learning (Morgan Kaufmann Series in Machine Learning) can make you truly feel more interested to read.
