Risk Assessment, Modeling and Decision Support: Strategic Directions (Risk, Governance and Society) From Springer

The papers in this volume integrate results from current research efforts in earthquake engineering with research from the larger risk assessment community. The authors include risk and hazard researchers from the major U.S. hazard and earthquake centers. The volume lays out a road map for future developments in risk modeling and decision support, and positions earthquake engineering research within the family of risk analysis tools and techniques.

Editorial Review

From the Back Cover

The papers in this volume integrate results from current research efforts in earthquake engineering with research from the larger risk assessment community. The authors include risk and hazard researchers from the major U.S. hazard and earthquake centers and some from abroad as well as programmers and analysts from leading insurance and risk assessment firms. The introductory chapter provides an historical overview of the rise of risk assessment in the U.S., with particular emphasis on the role of seismic risk assessment. Four key components of risk assessment and decision support software are analyzed in detail in the remaining papers: treatment of uncertainty, loss assessment, modeling of seismic mitigation strategies, and visualization of risk and uncertainty. The volume lays out a road map for future developments in risk modeling and decision support and positions earthquake engineering research within the family of risk analysis tools and techniques.

Users Review

From reader reviews:

Rodney Schmitt:

This Risk Assessment, Modeling and Decision Support: Strategic Directions (Risk, Governance and Society) are usually reliable for you who want to be described as a successful person, why. The main reason of this Risk Assessment, Modeling and Decision Support: Strategic Directions (Risk, Governance and Society) can be one of the great books you must have will be giving you more than just simple studying food but feed anyone with information that possibly will shock your previous knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions in e-book and printed ones. Beside that this Risk Assessment, Modeling and Decision Support: Strategic Directions (Risk, Governance and Society) giving you an enormous of experience such as rich vocabulary, giving you test of critical thinking that we understand it useful in your day task. So , let's have it and revel in reading.

Shawn Proctor:
