### **Editorial Review**

#### **Review**

From the reviews:

"This book is one in the valuable Decision Engineering series that focuses on the foundations and applications of tools and techniques related to decision engineering and identifies their roles in making decisions. ... We recommend this book for graduate-level students as well as all decision makers, especially in business and in government. Clearly, as demonstrated by the examples in the book, AHP can be applied to most subjects." (John Wang and Qiyang Chen, *Interfaces*, Vol. 35 (3), 2005)
