Editorial Review

From Publishers Weekly

Saudi Arabia, the world's leading oil producer, is also the world's most absolute feudal monarchy and the place where the gap between the haves and have-nots is the widest. Journalist Aburish (Pay-Off: Wheeling and Dealing in the Arab World) takes a close look at the 90-year-old dynasty, emphasizing recent history and the House of Saud's dictatorial, profligate and increasingly corrupt ways, aided in the last instance by U.S. oil companies. He compares the present situation in Saudi Arabia with Iran before the overthrow of the Shah in 1979?"blind, oblivious haughtiness by a hated ruling class." With a national debt approaching \$100 billion, the country's financial structure is on the verge of collapse. The West, says the author, must take immediate drastic action before a revolution results in a cessation of oil production, worldwide depression and the possibility of a jihad, or holy war, against the infidel West if, for instance, UN forces tried to occupy the oil fields. Aburish urges a complete reversal of U.S. policy, with Washington pressuring the House of Saud to share the national wealth with the Saudi people, to begin protecting their human rights and to give them a voice in the country's affairs. A well-researched and provocative expose/denunciation of Arabia's powerful ruling clan. Photos.

From Library Journal

The House of Saud rose to prominence during the 18th century, but it wasn't until the early 1900s that Abdul Aziz Rahman Al Saud (Ibn Saud) seized control of what is now Saudi Arabia. The House has come under fire from both the Shi'ite populations of the Islamic world and an increasingly large number of its own citizens. In this scathing account, the author contends that the members of the royal house are ruining the country with their self-indulgent spending and unnecessary military "toys." He states that the West must stop tolerating the Saudi persistence in maintaining the status quo. Aburish (Cry Palestine: Inside the West Bank, LJ 9/1/93) calls for "massive interference" in Saudi internal affairs to introduce controls on the "colossally wasteful habits of the royal family." He also urges an increase in oil prices and recommends that King Fahd be forced to form an independent consultative council and subordinate the succession to "the pressing needs for reform." Aburish's point is well taken, but his strident tone often overwhelms his argument.

Recommended for large libraries with major collections in this area. ?David P. Snider, Casa Grande P.L., Ariz.
