# Object-Oriented Programming with ABAP Objects

*By James Wood*

**Object-Oriented Programming with ABAP Objects** By James Wood

This book provides a gentle (and yet, comprehensive) start to programming object-oriented ABAP. What are objects? How to define and write classes? What's polymorphism all about?

The book helps you to venture the switch to object-oriented programming, and brings your skills up to date: First learn about all essential OO concepts, then see examples from daily development work. Exception handling, object debugging and unit testing are demystified here, plus, you get advice on enhanced techniques and tools in ABAP 7.0. The book will not spend time teaching basic syntax, but only concentrate on teaching object-oriented development – your chance to successfully explore ABAP OO.

**Topic Highlights**

- Working with Objects
- Encapsulation and Implementation Hiding
- Object Initialization and Cleanup
- Inheritance vs. Composition
- Polymorphism
- Component Design and Name Control
- Handling Exceptions and Debugging Objects
- Unit Testing with ABAP Unit
- Business Add-Ins and Enhancements
- Working with SAP Controls
- ABAP Object Services
- Using ABAP Objects with Workflow

## Editorial Review

About the Author
James Wood is the founder and principal consultant of Bowdark Consulting, Inc., an SAP NetWeaver consulting and training organization. With more than seven years of experience as a software engineer, James specializes in custom development in the areas of ABAP Objects, Java/J2EE, SAP NetWeaver Process Integration, and the SAP NetWeaver Portal. Before starting Bowdark Consulting, Inc. in 2006, James was an SAP NetWeaver consultant for SAP America, Inc. and IBM Corporation where he was involved in multiple SAP implementations. He holds a master's degree in software engineering from Texas Tech University. To learn more about James and the book, please check out his website at http://www.bowdarkconsulting.com.

## Users Review

**From reader reviews:**

**Karen Olden:**

Do you among people who can't read enjoyable if the sentence chained inside the straightway, hold on guys this aren't like that. This Object-Oriented Programming with ABAP Objects book is readable by you who hate the straight word style. You will find the info here are arrange for enjoyable studying experience without leaving even decrease the knowledge that want to deliver to you. The writer involving Object-Oriented Programming with ABAP Objects content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the articles but it just different by means of it. So , do you even now thinking Object-Oriented Programming with ABAP Objects is not loveable to be your top list reading book?

**Cary Barrett:**

Nowadays reading books are more than want or need but also turn into a life style. This reading practice give you lot of advantages. Advantages you got of course the knowledge your information inside the book which improve your knowledge and information. The data you get based on what kind of e-book you read, if you want get more knowledge just go with education books but if you want experience happy read one along with theme for entertaining such as comic or novel. The actual Object-Oriented Programming with ABAP Objects is kind of book which is giving the reader unforeseen experience.

**Myrtle Anderson:**

A lot of people always spent their particular free time to vacation or go to the outside with them loved ones or their friend. Are you aware? Many a lot of people spent they free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity honestly, that is look different you can read a book. It is really fun for you personally. If you enjoy the book that you just read you can spent all day long to reading a reserve. The book Object-Oriented Programming with ABAP Objects it is extremely good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading

this book. Should you did not have enough space to develop this book you can buy the particular e-book. You can m0ore quickly to read this book through your smart phone. The price is not too expensive but this book has high quality.

**Tim Andrus:**

What is your hobby? Have you heard this question when you got scholars? We believe that that question was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. So you know that little person just like reading or as reading become their hobby. You should know that reading is very important as well as book as to be the thing. Book is important thing to add you knowledge, except your current teacher or lecturer. You get good news or update about something by book. Many kinds of books that can you go onto be your object. One of them are these claims Object-Oriented Programming with ABAP Objects.
