The Great Courses: The Skeptic's Guide to American History Directed by The Great Courses

To take a skeptical approach to American history is not to dabble in imaginative conspiracy theories; rather, it's to reframe your understanding of this great nation's past and actually strengthen your appreciation for what makes American history such a fascinating chapter in the larger story of Western civilization. And in this bold 24-lecture series, you can do just that. Travel back in time and examine many commonly held myths and half-truths about American history and prompt yourself to think about what really happened in the nation's past - as opposed to what many believe happened. These lectures demonstrate how reconsidering some of the most popular notions of U.S. history can yield new (and sometimes startlingly different) interpretations of political, social, economic, and military events. But more than just debunking commonly accepted accounts, you'll be able to replace these misconceptions with insightful truths. Exploring both America's history and the verdicts that have been rendered about some of its most enduring figures - including George Washington, John Adams, Woodrow Wilson, Franklin Delano Roosevelt, and many others - these lectures investigate a wide-ranging list of questions. What impact did other nations have on the American Revolution? Has George Washington always been revered as president? Do we now understand the true blunders in America's Vietnam policies and tactics? In exploring these and other questions, these lectures prove themselves to be a delightful intellectual experience that will allow you to rethink not just the facts of U.S. history, but also their meaning.
