### Editorial Review

#### Review

"[The] best book on famine available--important theoretical perspective, good case-study material."--Barbara D. Miller, *Cornell University*

"Embodies the best tradition of social science....Empirical and rational, yet neither virtue is pushed to the point where human beings are forgotten."--*The Economist*

"A truly seminal book....[Has] helped to shift the attention of policy-makers and international organizations away from excessive concentration on food production to broader issues of 'food security.'"--*International Affairs*

#### From the Back Cover

The main focus of this book is on the causation of starvation in general and of famines in particular. The author develops the alternative method of analysis--the 'entitlement approach'--concentrating on ownership and exchange, not on food supply. The book also provides a general analysis of the characterization and measurement of poverty. Various approaches used in economics, sociology, and political theory are critically examined. The predominance of distributional issues, including distribution between different occupation groups, links up the problem of conceptualizing poverty with that of analyzing starvation.

#### About the Author

Amartya Sen is at Harvard University.
