Hieronymus Bosch, Painter and Draughtsman: Technical Studies By Luuk Hoogstede, Ron Spronk, Matthijs IJssink, Jos Koldeweij, Robert G. Erdmann, Rik Klein Gotink, Hanneke Nap, Daan Veldhuizen

Scholars have traditionally focused on the subjects and meanings of Hieronymus Bosch's works, whereas issues of painting technique, workshop participation, and condition of extant pictures have received considerably less attention. Since 2010, the Bosch Research and Conservation Project has been studying these works using modern methods. The team has documented Bosch's extant paintings with infrared reflectography and ultra high-resolution digital macro photography, both in infrared and visible light. Together with microscopic study of the paintings, this has enabled the team to write extensive and critical research reports describing the techniques and condition of the works, published in this extraordinary volume for the first time.

Editorial Review

Review

“[Gives] readers the opportunity to fully immerse themselves in the way Bosch’s paintings were created.”—*Art & Antiques*
(*Art & Antiques*)

“Dense [and] beautifully illustrated”—Ingrid D. Rowland, *New York Review of Books*
(Ingrid D. Rowland *New York Review of Books*)

“Exciting . . . a thrilling opportunity to climb inside each Bosch painting, to see the draftsman’s hand at work as he creates his underdrawings, to witness how he changes his mind and erases or adds imagery, then builds up his canvas layer by layer.”—Nina Siegal, *New York Times Book Review*
(Nina Siegal *New York Times Book Review*)
