Learning ArcGIS Geodatabase By Hussein Nasser

An all-in-one start up kit to author, manage, and administer ArcGIS geodatabases

About This Book

- Covers the basics of building Geodatabases, using ArcGIS, from scratch
- Model the Geodatabase to an optimal state using the various optimization techniques
- Packed with real-world examples showcasing ArcGIS Geodatabase to build mapping applications in web, desktop, and mobile

Who This Book Is For

This book is aimed at geospatial developers who want to work with ArcGIS geodatabases as well as manage them. Having knowledge of building a geodatabase from scratch isn't a must; Learning ArcGIS Geodatabases is ideal for those who want to use ArcGIS geodatabase for the first time, or for those who want to migrate from their existing legacy database to a geodatabase.

What You Will Learn

- Explore the benefits of geodatabases with practical illustrations
- Work with geodatabase datasets covering feature classes, tables, relationship classes, coverage, and annotations
- Model your geodatabase by creating a sturdy design that can sustain large edits and decrease maintenance
- Discover various tools to optimize queries and response time, which will help you to fine-tune your geodatabase
- Utilize Python scripting to author your geodatabase programmatically
- Set up and configure a full-fledged networked enterprise geodatabase using ArcSDE technology
- Add programming flavors to your geodatabase using Python

In Detail

ArcGIS is an industry standard for geospatial development and management. A geodatabase is the database used to store and manage the spatial data.

Learning ArcGIS Geodatabases offers a comprehensive working and practical experience for readers who are interested in knowing about ArcGIS. The initial chapters guide you through authoring geodatabases and creating a geodatabase schema and datasets. Then, the book focuses extensively on modeling and optimizing geodatabases.

Finally, you will be able to work comfortably with datasets, annotations, and relationship classes, making it easier to migrate from a legacy database to an ArcGIS geodatabase.

Editorial Review

About the Author

Hussein Nasser

Hussein Nasser is an Esri award-winning senior GIS solution architect at Electricity and Water Authority, Bahrain. He was the first author to write about the ArcGIS for Server technology after its complete revamp in Version 10.1. In 2007, Hussein won the annual ArcGIS for Server Code Challenge conducted at the Esri Developer Summit in Palm Springs, California, for using the AJAX technology with ArcGIS for Server, which was not implemented back then. His eight-year career as a GIS architect at the leading Middle Eastern engineering company Khatib & Alami involved implementing various utility GIS systems based on the Esri technology across the Middle East. After this, Hussein decided to move to a more focused environment at Electricity and Water Authority, Bahrain, his homeland, where he could channel his expertise to develop a robust GIS utility solution and fully integrate it with the e-government project, which would help Bahrain march towards the smart grid. Beyond GIS, Hussein is fascinated by acute research topics. Among the papers he is currently working on are The Human API: A Software Interface to Prevent Cancer, Global Economic Crisis and Natural Disasters Quantum Detector, and the Stock Market and the Moon Phases.

Users Review

From reader reviews:

Daniel Rogers:

Information is provisions for those to get better life, information these days can get by anyone in everywhere. The information can be a information or any news even a huge concern. What people must be consider any time those information which is inside former life are challenging to be find than now could be taking seriously which one works to believe or which one the particular resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take Learning ArcGIS Geodatabase as your daily resource information.

Kim Gray:

In this period of time globalization it is important to someone to receive information. The information will make someone to understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, newspaper, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. The actual book that recommended to you personally is Learning ArcGIS Geodatabase this publication consist a lot of the information of the condition of this world now. That book was represented how do the world has grown up. The words styles that writer value to explain it is easy to understand. The actual writer made some research when he makes this book. Honestly, that is why this book ideal all of you.

William Delacruz:

This Learning ArcGIS Geodatabase is brand new way for you who has intense curiosity to look for some information given it relief your hunger details. Getting deeper you onto it getting knowledge more you know or else you who still having tiny amount of digest in reading this Learning ArcGIS Geodatabase can be the light food for you personally because the information inside this kind of book is easy to get by anyone. These books develop itself in the form and that is reachable by anyone, yes I mean in the e-book type. People who think that in e-book form make them feel drowsy even dizzy this guide is the answer. So there isn't any in reading a e-book especially this one. You can find actually looking for. It should be here for you. So , don't miss it! Just read this e-book type for your better life and knowledge.

Jeanne Newman:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from a book. Book is prepared or printed or descriptive from each source which filled update of news. On this modern era like currently, many ways to get information are available for you actually. From media social like newspaper, magazines, science publication, encyclopedia, reference book, new and comic. You can add your understanding by that book. Do you want to spend your spare time to open your book? Or just seeking the Learning ArcGIS Geodatabase when you required it?
