### Editorial Review

#### Review

"I have tried Jerry Marlow's B-S Made Easy and plan to make it a requirement for my investments classes. Its animations provide intuitively clear visual explanations of the fundamental nature of stock market risk. It is an ideal complement to textbooks such as my own (Bodie, Kane, and Marcus, Investments). I have been using my own Excel simulations to illustrate this material in the past, but Marlow's animations blow mine away. Simply wonderful stuff!!" (Zvi Bodie, Professor of Finance Boston University School of Management)

"[S]imply the best. It makes every part of Black-Scholes so understandable. I knew Black-Scholes' option pricing model was important and use it every day in my trading, but never knew why or how it worked. [This] book provided me with a clear understanding of the model, and best of all, all I needed to understand the model was a basic mathematical background and some common sense."

—**Dong-Wook Kim**, Futures & Options Trader Equity & Derivatives Team, Hanwha Securities Co., Ltd
