Between Sex and Power: Family in the World 1900-2000 (International Library of Sociology) By Göran Therborn

The institution of the family changed hugely during the course of the twentieth century. In this major new work, Göran Therborn provides a global history and sociology of the family as an institution and of politics within the family, focusing on three dimensions of family relations: on the rights and powers of fathers and husbands; on marriage, cohabitation and extra-marital sexuality; and on population policy. Therborn's empirical analysis uses a multi-disciplinary approach to show how the major family systems of the world have been formed and developed. Therborn concludes by assessing what changes the family might see during the next century.

This book will be essential reading for anybody with an interest in either the sociology or the history of the family.

Editorial Review

Review

"...a great work of historical intellect and imagination. It is the fruit of a rare combination of gifts. Trained as a sociologist, Therborn is a highly conceptual thinker, allying the formal rigor of his discipline at its best with a command of a vast range of empirical data. The result is a powerful theoretical structure, supported by a fascinating body of evidence. In it, you can find the largest changes in human relations of modern times." - *The Nation*

'The richness of the data and the text provide a fascinating account of how much, and in some cases how little, family systems have changed over the century, and the pace of the book certainly underlines the pace of these changes. It deserves to become a classic text for students and researchers of families past, present and future.' - *Social Policy, Volume 36/2 - 2007*
