### **Editorial Review**

Amazon.com Review

Now in its fourth edition, *Criminal Profiling* is an established text centered on the deductive profiling method developed by the author. Deductive profiling is different from other forms of profiling in that it does not involve averaged, statistical profiles. Instead it focuses on criminal profiling as an investigative process, solving real crime through an honest understanding of the nature and behavior of criminals. It approaches each criminal incident as its own universe of behaviors and relationships. Throughout the text, the author illustrates the most crucial tenet that any good criminal profiler should adhere to: the enthusiastic desire to investigate and examine the facts. *Criminal Profiling* is an ideal companion for students and professionals alike, including investigators, forensic scientists, criminologists, mental health professionals, and attorneys. Readers will use it as a comprehensive reference text, a handbook for evaluating physical evidence, a tool to bring new perspectives to cold cases, and as an aid in preparing for criminal trials.

---

### **New Features**

- New cases in every chapter
- New chapters in logic and reasoning
- New chapter reviewing non-evidence based profiling methods
- New chapter on mass homicide
- New chapter on terrorist profiling and interviewing

### **Additional Features**

- Best-selling author Brent Turvey defines the deductive profiling method, which focuses on examining the nature and behavior of criminals in order to solve crimes.
  - Contributing authors represent law enforcement, academic, mental health, and forensic science communities for a balanced perspective.
  - Completely revised with 35% new material including updates on the latest advances in evidence-based profiling.
- 

### **Excerpts from *Criminal Profiling***

**Table 15.1** Motivational Categories of Critical Information Technology Insiders

Category	Motivational Descriptive Summary and Demonstrative Example
Explorers	Motivated by curiosity, rarely cause purposeful damage. Example: Idle employees access poorly protected network resources that they are not officially authorized to access.
Good samaritans	Motivated by a desire to "save the day" or to show off their abilities. Example: A system administrator on one system identifies a vulnerability on another system that is not the administrator's responsibility and breaks into the vulnerable system to fix it rather than informing the responsible system administrator.
Hackers	Motivated by a need to bolster self-esteem by violating access boundaries. Example: An individual connects his employer's secure network to the Internet in violation of policy, providing his friends on the Internet with access to the secure system and sensitive information it contains.
Machiavellians	Motivated by personal gain, damaging people and systems to achieve their goals. Example: An individual who enjoys traveling introduces malfunctions in her employer's equipment abroad so that she will be sent to other countries to repair the systems.
Exceptions	Believe that they are special and entitled to special treatment. Example: A system administrator has unique knowledge of an organization's computer systems and feels that he deserves better pay, benefits, and treatment than other employees.
Avengers	Motivated by specific perceived wrongs. Example: A system administrator hears that she is going to be laid off, so she encrypts patient files and holds them ransom in the hope of getting a better severance package.
Career thieves	Motivated by profit. Example: An individual embezzles money using an organization's computer system.
Moles	Motivated by profit but indirectly through espionage. Example: An individual who joins an organization with the express purpose of obtaining proprietary information that he can sell to competitors.

### *Case Example: Blackmail*

In an extortion case, the offender sent a message to the victim from a Web-based e-mail account. The Internet protocol (IP) address contained in the e-mail header showed that the message was sent from a computer located in an Internet café, but investigators were unable to determine who was using the computer at the time. Believing that the offender may have checked the Web-based e-mail account for responses to his message, investigators obtained all records relating to that account from the Internet service provider. These records indicated that the offender had indeed connected to the e-mail account from his home computer.

### Review

Praise for the third edition: "In the third edition of this very popular textbook, Brent Turvey clearly demonstrates that criminal profiling has established itself as a scientific endeavor rather than an exercise in investigative intuition. This textbook pulls together an impressive amount of substantive knowledge from a variety of disciplines in order to provide the reader with a foundation upon which to develop a mastery of the criminal profiling process. As Turvey demonstrates throughout the text, however, there are various methodological approaches to the practice of criminal profiling. Paramount among these, he argues, is the method known as Behavioral Evidence Analysis, which is described and illustrated in great detail throughout this remarkable book." --Daniel B. Kennedy, PhD, Forensic Criminologist, University of Detroit Mercy "The third edition of **Criminal Profiling** is sterling!" --Stan Crowder, Ph.D., Assistant Professor of Criminal Justice, Kennesaw State University, GA Praise for the previous editions: "This text documents the principles of proper criminal profiling and undertakes to establish definite criteria for professionalization...should be reviewed by anyone intent on becoming a professional criminal profiler." ?AMERICAN JOURNAL OF

PSYCHIATRY "...a thorough grounding in what is a relatively new field. This is more than a basic text and...should be required reading for all criminal investigators." ?CRIME AND JUSTICE

INTERNATIONAL "...an important contribution to the systematic study of the behavioural evidence linked to the perpetration of serious crimes...Brent Turvey's opus is a major and much needed step toward professionalism [of criminal profiling.]" ?THE EXPERT

"Decrying 'faith-based thinking' amongst some who call themselves criminal profilers, this work seeks to professionalize criminal profiling by insisting that it rest on a proper background in the behavioral sciences and criminal forensics; hence the secondary label found in the subtitle, "behavioral evidence analysis." The author (together with collaborators) describes the skills, techniques, and methods of this scientifically-oriented criminal profiling in 25 chapters organized into sections on introductory issues, forensic victimology, crime scene analysis, offender characteristics, and professional issues (i.e., ethics and trial testimony)."--**4<sup>th</sup> Edition review in Reference and Research Book News**

From the Back Cover

Focused on Behavioral Evidence Analysis (BEA), a method of criminal profiling developed and refined by the author over the past 15 years, the fourth edition of *Criminal Profiling* maintains the same core foundation that made previous editions best sellers in the professional and academic community worldwide. Written for practicing behavioral analysts and aspiring students alike, this work emphasizes an honest understanding of crime and criminals. Newly updated, mechanisms for the examination and classification of both victim and offender behavior have been improved. In addition to refined approaches towards victimology, crime scene analysis, motivation, and case linkage, a chapter on sexual deviance has been added as well. With prior editions in wide use as a primary text in criminal justice, law, criminology, and behavioral science programs around the world, *Criminal Profiling, Fourth Edition* remains essential for students and professionals alike.

**KEY FEATURES:** \* Outlines the scientific principles and practice standards of BEA-oriented criminal profiling, with an emphasis on applying theory to real cases. \* Contributing authors from law enforcement, academic, mental health, and forensic science communities provide a balanced perspective. \* Complete glossary of key terms. \* Companion web site includes all appendices from previous volumes and figure collections at <http://www.elsevierdirect.com/companions/9780123852434>. \* Manual web site provides an instructor's manual for each chapter, powerpoint slideshows, and case reports from Brent Turvey's work.
