Float Analysis: Powerful Technical Indicators Using Price and Volume By Steve Woods

A complete guide to trading with price, volume, and float

Float Analysis explains how to use the Woods Cumulative Volume Float Indicator, the landmark concept in technical analysis that teaches the reader how to accurately determine when to purchase stocks. This groundbreaking book also contains all-new insights on how to understand and profit from these indicators, how support and resistance are redefined by this innovation, and how to implement these strategies into a high-growth portfolio.

Steve Woods (Hyattsville, MD) is the Executive Director of FloatAnalysis.com and has written a number of articles for various journals including *Technical Analysis of Stocks & Commodities*.

New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered-some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

Editorial Review

Review

Steve Woods has done a thorough job of investigating and describing this new area of technical analysis...

--*Larry McMillian, author of McMillan on Options*

From the Inside Flap

float analysis

Powerful Technical Indicators Using Price and Volume

In *Float Analysis: Powerful Technical Indicators Using Price and Volume*, active trader Steve Woods introduces you to a powerful new technical analysis tool-his own Woods Cumulative-Volume Float Indicator-that will revolutionize the way you trade. Pushing the boundaries of technical analysis, Woods combines price and volume charts with the knowledge of available shares in the market, or float, to create a strongly predictive indicator that can target winning stocks with incredible accuracy.

Through his studies of W. D. Gann and a variety of classic charting methods, Woods has discovered a powerful new way of reading price and volume charts. His method-the Woods Cumulative-Volume Float Indicator-analyzes past trading volume to determine a stock's future price direction. It also pinpoints exactly when a float turnover occurs that triggers buy and sell signals. By learning how to identify these patterns, you can begin to predict measurable tops and bottoms, thereby getting in and out of the market with precision timing and unparalleled profits.

Written in clear, precise language and supplemented with charts and real-world examples, *Float Analysis* explains every aspect of how and when to use the Woods Cumulative-Volume Float Indicator and details the underlying theory of float analysis behind it.

This comprehensive trading guide also covers:

- * Ten breakthrough discoveries that will change the way you analyze stock charts
- * Support and resistance redefined
- * Successful trading strategies
- * How to understand and profit from indicators
- * How Gann Theory inspired float analysis

It's hard to find a trading book that charts out a completely new course for the serious trader, but in unveiling this landmark trading technique, *Float Analysis* has proven to be such a book. Now you can enjoy the benefits of this groundbreaking trading method by applying its winning techniques to your own portfolio. Follow the simple steps outlined in *Float Analysis* and you too can learn how to use the Woods Cumulative-Volume Float Indicator to make timely and profitable stock purchases.

From the Back Cover

- * Biggest Breakthrough since the ARMS index
- * Combines Gann theory with Price & Volume movements for explosive results
- * Successful strategies for high-growth portfolios

Float Analysis

Powerful Technical Indicators Using Price and Volume

"Float Analysis is an innovative indicator that all serious traders will want to familiarize themselves with to help determine the most effective buy and sell points for specific trades."

-Martin Pring

author of Martin Pring's Introduction to Technical Analysis

"[Steve Woods] has done a tremendous job of investigating and describing this new area of technical analysis and I highly recommend adding it to your arsenal of trading indicators."

-Larry McMillan

author of McMillan on Options

Float Analysis: Powerful Technical Indicators Using Price and Volume introduces a powerful new indicator that will revolutionize the way you trade. Pushing the boundaries of technical analysis, active trader Steve Woods combines price and volume charts with the knowledge of available shares in the market, or float, to form a strongly predictive indicator-his very own Woods Cumulative-Volume Float Indicator-that can target winning stocks with incredible accuracy.
