Handbook of Multiple Sclerosis By Jeffrey A. Cohen, Alexander Rae-Grant

Over the past 30 years there have been significant advances in our understanding of multiple sclerosis (MS) due to the use of MRIs to better visualize the disease and because of the introduction of new ameliorating drugs. However, MS is still an incurable disease and diagnosis remains challenging for many physicians; for instance symptoms often mimic MS and there is not a specific test for the disease. To ensure optimal patient care there is a need for physicians to remain up to date with new drugs on the market, disease detection, diagnosis, and latest management options. The Handbook of Multiple Sclerosis (Second Edition) provides a concise, easily assessable guide for all healthcare professionals involved in the diagnosis and management of this condition, including standard therapies, as well as more novel treatments. The book includes comprehensive evaluations of the pharmacological treatments available, including novel investigational agents currently in development.

Editorial Review

About the Author

Jeffrey A Cohen MD is Professor of Medicine (Neurology) in the Cleveland Clinic Lerner College of Medicine of Case Western Reserve University and has worked at the Cleveland Clinic's Mellen Center for Multiple Sclerosis Treatment and Research since 1994. Dr Cohen received his BA in Zoology from Connecticut College in 1976 and MD from the University of Chicago Pritzker School of Medicine in 1980. He completed a neurology residency in 1984, then a 3-year neuroimmunology fellowship with Robert Lisak MD and Mark Greene MD at the University of Pennsylvania. He was on the faculty in the department of neurology at the University of Pennsylvania from 1987 to 1994. Dr Cohen's research interests included autoimmune mechanisms, anti-viral immunity, lymphocyte activation, and glial biology as they relate to multiple sclerosis (MS). Dr Cohen moved to the Cleveland Clinic in 1994 to direct the Mellen Center's Experimental Therapeutics Program. He has been involved in various capacities in a large number of clinical trials developing new therapies for MS. In addition, he has helped develop new clinical and imaging endpoints for MS trials. At the Mellen Center, Dr Cohen also directs the Clinical Neuroimmunology Fellowship that has trained a number of MS clinical investigators. Finally, Dr Cohen has a large clinical practice devoted to the diagnosis and management of MS and related disorders.

Alexander Rae-Grant, MD FRCP is a staff neurologist at the Cleveland Clinic. After receiving his Bachelor of Arts in biochemistry and molecular biology from Yale in 1979, he graduated from McMaster University Medical School in 1982. He completed 2 years of internal medicine at the University of Toronto then a neurology residency at the University of Western Ontario in 1987. Dr Rae-Grant joined the Cleveland Clinic's Mellen Center for Multiple Sclerosis Treatment and Research in 2007, where he is engaged in patient care and clinical trials and directs the patient and professional educational efforts. He is active in medical student, resident, and fellow training and co-directs the neurosciences clinical clerkship in the Cleveland Clinic Lerner College of Medicine. Dr Rae-Grant was recently honored as "Teacher of the year" for the Neurology Department at the Cleveland Clinic. He authored the neurology textbook *Neurology for the House Officer* and co-edited *The 5-Minute Consult in Neurology*.

Users Review

From reader reviews:

Diana Sturgill:

Book is written, printed, or created for everything. You can recognize everything you want by a book. Book has a different type. As we know that book is important matter to bring us around the world. Adjacent to that you can your reading ability was fluently. A publication Handbook of Multiple Sclerosis will make you to become smarter. You can feel far more confidence if you can know about every thing. But some of you think this open or reading some sort of book make you bored. It is far from make you fun. Why they can be thought like that? Have you searching for best book or acceptable book with you?

Marian Perkins:

What do you regarding book? It is not important to you? Or just adding material when you require something to explain what the ones you have problem? How about your time? Or are you busy person? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have spare time? What did you do? Every individual has many questions above. They need to answer that question simply because just their can do in which. It said that about guide. Book is familiar in each person. Yes, it is suitable. Because start from on jardín de infancia until university need this specific Handbook of Multiple Sclerosis to read.

Jeffrey Channell:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their sparetime with their family, or their particular friends. Usually they carrying out activity like watching television, planning to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you wish to something different to fill your own free time/ holiday? Might be reading a book can be option to fill your no cost time/ holiday. The first thing you ask may be what kinds of guide that you should read. If you want to test look for book, may be the e-book untitled Handbook of Multiple Sclerosis can be fine book to read. May be it may be best activity to you.

Sharon Baker:

Many people said that they feel uninterested when they reading a book. They are directly felt that when they get a half elements of the book. You can choose the book Handbook of Multiple Sclerosis to make your own personal reading is interesting. Your own personal skill of reading expertise is developing when you including reading. Try to choose straightforward book to make you enjoy to study it and mingle the idea about book and studying especially. It is to be very first opinion for you to like to open a book and read it. Beside that the publication Handbook of Multiple Sclerosis can to be your friend when you're sense alone and confuse in doing what must you're doing of these time.
