Making Decisions By Dennis V. Lindley

Making Decisions Second Edition D.V. Lindley Formerly Professor of Statistics, University College London This book looks at the problems involved in decision-making and argues that there is only one logical way to make a decision. By the use of three basic principles--assigning probabilities to the uncertain events; assigning utilities to the possible consequences; and choosing that decision that maximizes expected utility--decisions can be reached more efficiently and with less disagreement. It shows that only maximization of expected utility leads to sensible decision-making. This extensively revised second edition uses only elementary mathematics and will be of interest to all those concerned with decision-making and its consequences. Since his retirement from University College London in 1977 Professor Lindley has held visiting appointments at Berkeley, University of Florida, George Washington University, University of Sao Paulo, University of Wisconsin, Monash University, Australia, and University of Canterbury, New Zealand. Contents

- * Decisions and uncertain events
- * A numerical measure for uncertainty
- * The laws of probability
- * A numerical measure for consequences
- * The utility of money
- * Bayes' Theorem
- * Value of information
- * Decision trees
- * The assessment of probabilities and utilities
- * An appreciation

Appendix Answers to exercises Glossary of Symbols Subject Index

Users Review

From reader reviews:

Walter Johnson:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to know everything in the world. Each e-book has different aim or even goal; it means that guide has different type. Some people truly feel enjoy to spend their time and energy to read a book. They can be reading whatever they acquire because their hobby is actually reading a book. Think about the person who don't like examining a book? Sometime, particular person feel need book if they found difficult problem or maybe exercise. Well, probably you should have this Making Decisions.

Kevin House:

Now a day folks who Living in the era just where everything reachable by connect with the internet and the resources inside it can be true or not call for people to be aware of each details they get. How individuals to be smart in having any information nowadays? Of course the reply is reading a book. Reading a book can

help persons out of this uncertainty Information particularly this Making Decisions book because this book offers you rich facts and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it you probably know this.

Ronald Folk:

Information is provisions for folks to get better life, information these days can get by anyone with everywhere. The information can be a know-how or any news even restricted. What people must be consider if those information which is within the former life are challenging to be find than now could be taking seriously which one would work to believe or which one the particular resource are convinced. If you receive the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Making Decisions as the daily resource information.

Lester Baker:

Your reading 6th sense will not betray you actually, why because this Making Decisions publication written by well-known writer who really knows well how to make book that can be understand by anyone who read the book. Written with good manner for you, leaking every ideas and composing skill only for eliminate your own personal hunger then you still doubt Making Decisions as good book not merely by the cover but also from the content. This is one e-book that can break don't ascertain book by its handle, so do you still needing one more sixth sense to pick this!? Oh come on your reading sixth sense already alerted you so why you have to listening to one more sixth sense.
